

# MYCV SYSTEM

## MYCV SYSTEM

Make your job easier with the help of our myCV system! At the JOBVERSE Job Fair, all visitors register online before entering and have the opportunity to upload their CVs, which they can use to apply to the most suitable exhibitors in no time.

## WHAT IS MYCV?

With the help of the myCV system, by scanning the QR code on the visitors' Career Pass, the jobseeker's application material (the data and CVs provided during registration) will be visible and later downloadable.

To be able to use it, we provide 1 iPad with internet access (but you can also request more devices), and we personally inform our partners on the usage of the system and the steps to comply with GDPR rules.

## HOW CAN IT HELP WITH RECRUITMENT?

The myCV system is an important addition to corporate microsites, as it ensures that jobseekers are electronically matched to the right positions - within seconds.

By replacing paper CVs, administrative time is reduced to a fraction of the time it used to be, and it is also a major step forward in protecting our environment.

## 5 REASONS WHY YOU SHOULD USE THIS SERVICE:

- 1 No follow-up administration time, CV scanning, additional expenses.
- 2 Data is available immediately in a structured format.
- 3 With the help of the evaluation function, "pre-selection" happens as well, increasing the intensity of the selection process.
- 4 Digital data can be imported directly into your own company database.
- 5 You don't have to worry about GDPR regulations, because you'll receive the data and CV of visitors who have applied according to existing legislation.

## DOWNLOAD OPTIONS:

- Downloading single users one by one.
- As a database in .XML format.
- In an Excel file including all available data - without CV.
- Downloading data of all applicants as a packaged file - for e-mail chain notification.
